Learning4Impact strengthens planning and evaluation knowledge and skills through interactive, applied learning. Whether it's virtual or in-person workshops, **Learning4Impact** can help you plan, implement, evaluate, and share results.

Evaluation Design

What do you want to do and how will you know if you did it?

This series will help you design an evaluation at the front end that provides a shared understanding of your program's intended impact and how it will be measured.

Develop a Program Logic Model
A road map for your desired impact, logic models outline the program theory of change. Join us to discuss the development and value of logic models.

Develop a Program Evaluation Framework
You need to outline what you want to measure, monitor and report on. Join us to discuss using an evaluation framework to focus the time and energy needed to understand your program impact.

Planning and Evaluation Foundations

You know what you want to measure, now you need to decide who you want to gather data from and how.

This series will refine your ability to design surveys, focus groups and interviews.

Choose the Right Data Collection Method
If you want good data, you need the right data collection tools. Join us to learn how to choose the method that will work for your program.

Survey Design Basics
Even with online survey tools easily available, you still need to apply survey design principles. Join us to learn how to use surveys to gather feedback about your program.

Design Interviews and Focus Groups
You want feedback from program participants, but don't know where to start. Join us to learn about making space to hear from people in a focus group or interview.

Conduct Interviews
You've designed an interview tool – now it's time to gather the data. Join us to learn and practice strategies and techniques to conduct good interviews.

Conduct Focus Groups
With a focus group guide in hand, it's time to lead the discussion. Join us to learn and practice strategies and techniques for conducting a focus group.

Analyze Qualitative Data
Qualitative data can tell a rich story about your program's progress and impact. Join us to learn qualitative analysis concepts and processes, and have an opportunity to practice coding sample data.

Excel4Evaluation

Are you using Excel to its full potential?

In this series, you'll learn a range of basic, intermediate and advanced functions - everything from importing and cleaning your data to writing and using complex formulas.

Excel Foundations – Get Familiar with the Excel Environment

Excel can help you better manage information. Whether you already use the basic functions or have never opened Excel, join us and learn how to better navigate the Excel platform.

Easy Excel Charts

Quantitative data can tell a story about your program - if you can create accessible charts. Join us to learn to create basic data visualizations by adapting Excel generated charts.

Link Excel Data

Linking information between multiple Excel worksheets can help you easily search and analyse data. Join us to learn how to create relationships in your data using Excel formulas and built-in Excel tools.

Explore Excel Data: Patterns and Formulas

Are you able to use basic Excel formulas? Join us to learn how to set up an analysis sheet and practice writing basic formulas.

Explore Pivot Tables

Pivot tables can help you quickly explore your data. Join us to better understand, analyze and summarize information.

Strategic Planning

What does your organization want to accomplish in the next few years? How will you know if you are successful?

This series will help you strengthen the development and utilization of your strategic plan – using key performance indicators and progress reports to track progress and align reporting across the organization.

Prepare for Strategic Planning

Is your strategic plan coming up for renewal? Join us to better understand the process, purpose and levels of engagement.

Report on your Strategic Plan

Could you make better use of your strategic plan? Join us to discuss reporting on progress and aligning your strategic plan with operational and program planning.

Develop Key Performance Indicators

Do you need to tell the story of your organization's impact with numbers? Join us to discuss using Key Performance Indicators (KPIs) to track organizational health and communicate your organization's contribution to the community.

Effective Story Telling

Are you able to share information in a way that engages people? Do you sometimes wonder why nobody else is as excited about the data as you?

This series will help you make information relevant and accessible; allowing you to engage others – with discussion and action - toward a common end.

Making Data Make Sense

Understandable data can inform and shape our programs, policies and organizations.
Join us to explore data visualization and plain language principles, helping make your work relevant for the people you want to engage.

Delivery Matters

Have you ever been to a presentation that keeps you engaged from beginning to end?
Join us to talk about how you can share information in a presentation that is remembered - for the right reasons.

HeaLTH in COMMON also offers...

LeaDiNG4IMPaCT
A co-learning opportunity for non-profit leaders.

CHANGe MaNaGeMeNT PRACTiTiONeR CeRTiFiCaTiON
An opportunity to enhance your ability to plan, implement and manage the impact of change.
